nature of 223
Trypanosoma cruzi 218ff
sialidases
African trypanosomes 222ff
African/American trypanosomes 224
American trypanosomes 218ff
nature of 223
simian malaria 247ff
social deprivation
lice as index 412ff
solute transport 207
spleen
and expression of variant surface antigens 284
sporozoites
development in mosquitoes 211
infectivity 211
malarial 210ff
quantity versus quality 212ff
release of circumsporozoite protein 211ff
transmission and disease control 213
vaccines 214
viability 211
sulfadoxine-pyrimethamine
malaria costs and fatality rates 173
surra disease 41ff
see also trypanosomiasis
symbiosis 458ff
insects 180
symbiotic bacteria
foreign gene expression in 180ff
modifying arthropod vectors 179ff

T

T cells
tolerance 377ff

taeniasis/cysticercosis
potential eradication (L) 464
TDR programme
new targets and management structure 439ff
thalassaemia
epidemiology 241ff
geographical distribution 242
molecular genetic basis 242
thalassaemia variants
protection against malaria 241ff
Theileria parva
genome analysis 388ff
vaccine development 385ff
theileriosis
cell biology 312
epidemiology 312
sporozoite antigens 311ff
theilericidal drugs 312
tropical 310ff
vaccine 310ff
ticks
breeding for resistance to 15
cattle *see* cattle ticks
control, integrated 16ff
distribution in Africa 266ff
effects of host resistance 14
immunological responses to bites 14
mathematical models of disease transmission 277ff, 292 (L)
resistance assessment 16
vaccination against 15
world losses due to 13
Toxoplasma spp
taxonomy 102ff
Toxoplasma gondii
development of genetic systems 392ff
DNA transfection 393ff
life cycle 335
molecular karyotype 393
RFLP linkage map 393
vaccine 335ff
toxoplasmosis 61ff, 292 (L)
atovaquone therapy 68
congenital 61ff, 292 (L)
first commercial vaccine 335ff
in immunocompromised patients 61ff, 292 (L)
trans-sialidase
and escape from phagolysosomes 220
function 219, 220ff
model of action 221
structure 219
Trypanosoma cruzi 218ff, 224
Trichinella spp
biochemical characterization 250 (L), 463 (L)
Trichuris spp
antigens 310
resistance and susceptibility 309ff
update 309ff
tropical infectious diseases
immunology and molecular biology 349ff
trypanocides 44
Trypanosoma spp
immunosuppression 427
chitinase in transmission 254
immunological abnormalities 425
immunosuppression mechanisms 424ff
Trypanosoma brucei
differentiation from *T. congolense* (L) 96
electrophoretic RNA profile (L) 96
flagellar pocket 201ff
glucose transport 206ff
glucose uptake 207ff
proline transport 206ff
sialidase 223
Trypanosoma congolense
differentiation from *T. brucei* (L) 96
electrophoretic RNA profile (L) 96
Trypanosoma cruzi
immunological abnormalities 425
immunosuppression 426ff
infection in women 198ff
molecular parasitology 113ff
ribosomal P protein family 381ff
sialidase 222ff
trans-sialidase and cell invasion 218ff
transfer of sialic acid residues 376
Trypanosoma evansi
in Chinese livestock 41ff
Trypanosoma vivax
sialidase 222ff
trypanosomal infections
immunological abnormalities 425
trypanosomes
African, drug resistance 190ff
African, polyamine and S-adenosyl methionine metabolism 192
African/American 57 (L), 224
endocytosis 201ff
flagellar pocket 201ff
host defence mechanisms 64ff
mosaic genes 63ff
oligosaccharide biosynthesis 373ff
penetrating peritrophic membranes 48ff
sialidases 222ff
surface molecule conservation 316ff
variant surface glycoprotein 63ff
trypanosomiasis
control 44
domestic animals in China 41ff
epidemics 43
vectors 41
trypanothione
melarsoprol and 191
tsetse
distribution in Africa 266ff
tuberculosis
prevalence 195
typhus 412

U

ubiquitin system 30

V

vaccination
against ticks 15
'concealed' antigens 132ff, 334 (L)
vaccine development
Haemonchus contortus 338ff
malaria 300ff, 349ff
schistosomiasis 350
sporozoites 214
Theileria parva 385ff
toxoplasmosis 335ff
vectors
bias toward infected hosts 442, 464 (L)
Verticillium chlamydosporium
nematode trapping 138

W

worms
and protozoa 258ff
expulsion from tissues 115ff, 351 (L)
Wuchereria bancrofti
maternal infection as risk factor in offspring 418ff

Back Issues of Elsevier Trends Journals

Back issues from 1992 and 1993 are available to our customers at the following rates. Please state which issue(s) you require, including the volume and number (or year and month).

Issues(s): _____

_____

_____

Please tick how many issues you would like below. Issues are available in bulks at discounted rates – institutions/libraries must pay institutional rates.

Individual Rates

- ❑ Single issue £16.00/$25.00 each
- ❑ Five issues £68.00/$106.00 (includes 15% discount)
- ❑ Ten issues £120.00/$187.00 (includes 25% discount)

Institutional Rates

- ❑ Single issues £33.00/$52.00 each
- ❑ Five issues £140.00/$218.00 (includes 15% discount)
- ❑ Ten issues £248.00/$387.00 (includes 25% discount)

PAYMENT METHOD:

- ❑ Personal cheque, Eurocheque, or money order made payable to **Elsevier**
- ❑ Credit card
  - ❑ Visa/Barclaycard ❑ Mastercard/Access ❑ American Express

Card no: _____

Expiry date: _____

Titles in the Trends series include:

- Immunology Today
- Parasitology Today
- Trends in Biochemical Sciences
- Trends in Biotechnology
- Trends in Cell Biology
- Trends in Ecology & Evolution
- Trends in Food Science & Technology
- Trends in Genetics
- Trends in Microbiology
- Trends in Neurosciences
- Trends in Pharmacological Sciences
- Trends in Polymer Science
